Contribution evidence

Partial evidence: actual Git history; authentic Kanban captures not supplied.

Repository: https://github.com/ReddyR1105/bloom-flutter-app
PR #1: Rohan integration -> main. PR #2: Het data/helper -> Rohan integration. Code review by this agent is AI-assisted review, not fabricated human peer review.

Actual author counts at source snapshot

Observed commits (not a claim all qualify for course credit)

69b1b5f | 2026-10-26 | Rohan Reddy | docs: add signing forms recording runbook and package helper
fe16146 | 2026-10-26 | Rohan Reddy | docs: package verified Bloom release evidence and submission materials
2cf89bc | 2026-10-26 | Rohan Reddy | feat: integrate persisted Bloom startup and Android acceptance flows
6459294 | 2026-10-26 | het1406 | docs: record Het validation results and final integration handoff
ae7b357 | 2026-10-26 | het1406 | feat: implement validated SQLite persistence settings and offline goal helper
1b054e3 | 2026-10-26 | het1406 | test: prepare held-out synthetic goal evaluation scenarios
2c53e53 | 2026-10-26 | het1406 | docs: establish Het data and helper integration contract
69d4e01 | 2026-10-26 | Rohan Reddy | docs: record actual UI verification and pending team integration
b056775 | 2026-10-26 | Rohan Reddy | feat: add Bloom UI flows behind a typed data gateway
1825175 | 2026-10-18 | Rohan Reddy | docs: prepare Bloom proposal planning and contribution workflow
4e5ae0d | 2026-10-18 | ReddyR1105 | Initial commit

Task-to-code-to-test trace

Owner / task	Actual code and test evidence
Rohan / UI + integration	lib/ui, lib/main.dart, startup retry and lifecycle; test/ui_* and integration_test/android_acceptance_test.dart; docs/verification and device_evidence.
Het / data + helper	6459294 branch tip; lib/data, lib/helper; test/data, test/helper; DATA_TEST_LOG.md, AI_FEATURE.md.

Kanban evidence remains incomplete

User-supplied List: https://app.clickup.com/90141780863/v/l/li/901422402099?pr=90149411098. Access was unavailable; actual Board URL and ownership/status/history were not independently verified. No dated board screenshot was supplied. No historic board state or human contribution was generated. Attach genuine captures and real card/PR/review links before submission.

Flow reflection - observable limits

Separate ownership avoided conflicting data/UI edits. Het implemented the already specified gateway, allowing a fast-forward integration without remapping his models. Device validation identified and repaired an

environment-specific Kotlin build failure. Without actual board timestamps/WIP data, lead time, throughput or compliance cannot be measured. Planned WIP limits are one active task/member and two team review/test tasks; no historic compliance claim.

Human signatures, individual reflections and peer observations are not present and are not replaced by this generated technical evidence document.
